ROXOR

WRAS Identification

What is WRAS Approval?

WRAS (Water Regulations Approval Scheme) is a UK certification scheme that demonstrates a product has been tested and approved to meet the requirements of the Water Supply (Water Fittings) Regulations 1999 and relevant Scottish requirements.

WRAS-approved products are designed to help protect the UK water supply by ensuring that materials and fittings do not contaminate drinking water, wastewater or compromise water quality.

For customers, WRAS approval provides added peace of mind that a product meets recognised standards for water safety, quality and regulatory compliance.

Look out for our Roxor logo – we only use the Roxor logo on products that are WRAS approved. You can verify this by visiting the WRAS website https://www.wrasapprovals.co.uk/ and searching for the model code in the search bar of the homepage. Only approved products are listed.
